

GOVERNANCE FRAMEWORK ON Data Protection & Cybersecurity

Application of International Community-Driven Standards

TUESDAY, OCTOBER 8, 2024 * 1:30 PM TO 4:45 PM VIA **zoom**

In today's digital world, integrity lies on business enterprises' and government agencies' capability to ensure protection of personal data and security of information. They have to guarantee privacy rights, controlled data access, legitimate data use, authorized data disclosure, reliable infrastructure, and the quality of data.

This three-hour webinar, drawn from globally recognized community-driven standards and frameworks, will uncover core principles, statutory requirements, and regulatory controls of data protection and cybersecurity; construct robust risk and threat models with internationally recognized security standards; and establish a foundation for effective handling of security events and incidents.

It will not only discuss defense against adversarial tactics that threaten information confidentiality, but also laws that make governing bodies and management teams accountable for performance, conformance, and non-conformance. We will walk you through governance of data protection and cybersecurity being a "human-based system" that lies in directing, overseeing, and holding organizations accountable for achieving security obligations.

Register today, fortify your organization against cyber risks and data privacy challenges, and protect yourself from future liability threats. Attend!

Course Director & Lecturer: **Mr. John J. Macasio**

He is the trainer and consultant at the Information and Communications Technology Literacy and Competency Development Bureau of the Department of Information and Communications Technology.

He has recently done capability building of management and workforce on privacy impact assessment and privacy and security management manual with the following organizations among many others: Department of Finance and some of its attached agency; Department of Agriculture - National Meat Inspection Services; PhilHealth - Information Security Group; Light Rail Transit Authority; Philippine Fish Port Authority; MAA General Assurance; and PHIVIDEC Industrial Authority
